

PEER MENTORING

C.S. Mott Children's Hospital Craniofacial Anomalies Clinic has partnered with the Patient and Family Centered Care (PFCC) Program to offer a Peer Mentoring Program.

- **What is a peer mentor?** A peer mentor is a patient who has been on a similar health journey as the one you are facing. Each peer mentor is available to share their experiences, provide information, answer your questions and provide emotional support.
- **How are they trained?** Each peer mentor has attended formal training as well as receives ongoing staff support and follow up.
- **How does it work?** You will be provided with contact information of one of our mentors. The two of you will determine the amount of contact, type of contact, as well as duration of the relationship.
- **How can I be matched with a peer mentor?** If you feel you may benefit from being connected to one of our mentors contact our social worker Laura Hatch, LMSW at 734-232-6943 or lhatch@med.umich.edu

We look forward to connecting you with a mentor!
